About This Game

In WARMACHINE, the very earth shakes during fierce confrontations where six-ton constructs of iron and steel slam into each other with the devastating force of a locomotive, where lead-spewing cannons chew through armor plating as easily as flesh, and where bold heroes set the battlefield ablaze with a tempest of arcane magic as they forge the fates of their unyielding nations in the fires of destruction.

Take control of an elite battle mage known as a warcaster and his army of unstoppable warjacks and deadly soldiers in this intense and aggressive turn-based tactical combat game set in the award-winning, steam-powered world of the Iron Kingdoms.

WARMACHINE: Tactics is a next-generation turn-based tactical game developed with the Unreal 4 engine. Cutting-edge visuals, an immersive world setting, and squad customization features offer a rich multiplayer experience along with an extensive single-player campaign that will appeal to fans of revered tactical games like X-Com: Enemy Unknown and The Valkyria Chronicles.

Clunky outdated interface that they tried to match to a board game. Too many ways to screw up a locked turn with rules that seem not conducive to fun play.. I am an avid Warmachine\/Hordes player on the Tabletop and backed this game at the Kickstart. Since then I've installed it multiple times TRYING desperately to even like it. I just can't.

Everyone wants a way to play the table top game online without using Vaasal. I think the devs of this game were afraid that if they actually made it good, or with the same rules\/skills mechanics as the tabletop game, it would hurt the table top game. They are wrong. It would have become a foundational gateway to new players that would come from video gaming, into the tabletop.

Overall, this game missed every opportunity to be something for everyone and instead, is nothing. Its a shame.
